Comment:

A traffic engineer in the Town of Cary says that the NCDOT handed over all technical control of many signalized intersections to the Town of Cary. If this statement is true, which intersections are those?

(Even though I asked Lisa for this information, and Lisa said she'd ask Buddy, I thought I'd officially request it.)

Thanks!

Brian,

Several years ago, the Town of Cary established a Traffic Engineering Department. They work under Public Works and Cary's Engineering Department. They maintain 153 locations, 143 of which belong to NCDOT (everything inside the city limits and a couple of signals in Morrisville). NCDOT and the Town have a maintenance agreement where we pay the Town to maintain our signals. There is a Traffic Control/Management Center located at City Hall. They would be more than happy to show you.

They have 2 engineer technicians that monitor their traffic signal system via computer and cameras. They have a full time traffic engineer whose main responsibility is traffic signal timing throughout Cary and two other engineers that keep up with developers, city projects, etc. You can call David Spencer with the Traffic Engineering Department to get more information (462-3833)

If you have any other questions or need additional information, please feel free to call me at 220-4600 or email me directly to amckay@ncdot.gov

Regards,

Andy McKay

Deputy Division Traffic Engineer, Division 5.
